- *Integrated Accounting.*
- *Budget Availablity Tracking .*

E-Procurement

A completely online work flow for the entire procurement process makes the software unique amongst its peers. The detailed and comprehensive process starts with raising a requisition for any required Item or Service on board and runs through till Invoice creation.

Further it integrates automatically into the Accounting module for Payment clearance to the Supplier.

Key Features are:

- *Indent Creation and Approval.*
- *Online Tender Processing and Receipt of Quotes.*
- *Quote Comparison and Approvals for selection of Vendor.*
- *Issuing Purchase Orders Online.*
- *Receipt of Material with stock Updation.*
- *Invoice receipts and transfer to Accounts for Payment Clearance.*
- *Issuing Direct Purchase Orders, Non – PO Invoices wherever required.*
- *Projection of Budget Availability at every stage of progress.*
- *In built statistical tools provide various options for clear and accurate analysis and presentation of the data.*
